Plant Height: 24 inches

Flower Height: 3 feet

Spread: 3 feet

Spacing: 24 inches

Sunlight: ○ ◐

Hardiness Zone: 7

Group/Class: Bodacious Series

Description:

Vibrant violet-purple flowers with black calyces emerge on tall spikes from late spring until frost, over rich, dark green foliage; fast growing and vigorous; prefers well drained garden soils; great for containers and rock gardens

Ornamental Features

Bodacious Smokey Jazz Sage features showy spikes of violet flowers with purple overtones and black calyces rising above the foliage from late spring to mid fall. Its fragrant pointy leaves remain dark green in color throughout the season. The black stems are very colorful and add to the overall interest of the plant.

Landscape Attributes

Bodacious Smokey Jazz Sage is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Bodacious Smokey Jazz Sage is recommended for the following landscape applications;

8785 Green Lake Trail
Forest Lake, MN 55025
651-462-5554

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Bodacious Smokey Jazz Sage will grow to be about 24 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 3 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 24 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

Bodacious Smokey Jazz Sage is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
